Heat Pumps and Duct Flow Testing: Expanding the EA's tool kit

December 5, 2023 | 2:00-3:30pm EST

The Canadian Association of Consulting Energy Advisors (CACEA) is pleased to facilitate discussion about how duct flow testing contributes to heat pump sizing and selection; and how energy advisors (EA) can play a pivotal role in this new market offering.

The event will kick off with a panel discussion – engaging industry stakeholders who will share their perspective about current heat pump sizing challenges and opportunities in the Part 9 residential sector – in particular, the retrofit of heat pump systems.

THE PANEL:

- Steve Baden, Residential Energy Services Network (RESNET)
- Ryan Coleman, Ecolighten Energy Solutions Ltd.
- Gary Hamer, BC Hydro
- Chris Higgins, City of Vancouver
- Jérémie Leger, Natural Resources Canada.

Following the panel discussion, Mark Rosen MEA with Building Knowledge Canada and CACEA's project manager, will provide a report on CACEA's research project funded by Natural Resources Canada about assessing, evaluating, and analysing duct systems and their air flow and static pressure in houses across Canada. The discussion will also address lessons learned from trialing this new testing procedure using EAs in the field.

Finally, Mark Rosen will facilitate an interactive discussion with three of the Duct Flow EA project participants. Each will share their perspective on the future benefits and opportunities for EAs performing duct flow testing for the home building and renovation industry.

This is event available to CACEA members.

NRCAN PARTICIPANTS: Use the link below to access your unique Zoom webinar link. You will have to sign in and provide your email. After registering, you will receive a confirmation email containing information about joining the webinar.

About The Canadian Association of Consulting Energy Advisors (CACEA)

CACEA is a national association that promotes and supports Energy Advisors (EA) across the country. Our mission is to support a sustainable and recognized profession of valued and credible Canadian EAs. We promote the interest of EAs for the betterment of our members – ensuring they are recognized as best in class – and supporting energy efficiency and carbon reduction initiatives across Canada to better serve the Canadian homeowners and our stakeholders. CACEA recently introduced their Master Energy Advisor (MEA) credential recognizing highly-experienced EA members. For information visit our website www.cacee.ca or email info@cacee.ca.
