Announcing CACEA's New Technical Liaison Director

The Canadian Association of Consulting Energy Advisors' (CACEA) is pleased to announce its newest team member. Alison Conroy – who will serve as our new Technical Liaison Director and represent CACEA – particularly in British Columbia, will support the board of directors and be a conduit between multiple stakeholders, its members, and the larger EA community.

About Alison Conroy

Alison has always had a keen interest in energy efficiency in the built environment. In 2011, she attained her EA designation through NRCan, which she held for over 11 years, during which time she completed over 750 single family assessments in new and existing construction including serving as an active member of CACEA for several years. Alison is always looking for ways to expand her knowledge in the field of building science, and has completed the Passive House Consultant, Passive House for Trades, CHBA Net Zero, LEED AP and TECA Heat Loss training and certification programs.

Alison holds a Master of Engineering in Integrated Wood Design degree from the University of Northern British Columbia and is currently working on completing her PhD with a focus on high performance wall design. Through her company, Pelican Consulting, Alison provides building envelope design consultation and large-building air leakage testing services. She has also served on numerous industry boards and committees, including the Board of Directors for CHBA Northern BC and the BC Energy Step Code Council Energy Advisor and Compliance sub-committee. Alison currently lives in Prince George, BC, with her husband, two daughters and dog. When she's not "geeking out" over building science, she can be found playing outdoors or enjoying a good meal and beer with friends.

About The Canadian Association of Consulting Energy Advisors (CACEA)

CACEA supports a sustainable and recognized profession of valued and credible Canadian energy advisors (EA) and is committed to working with the building and energy community and facilitating opportunities to enhance the EA's profile, contribution, and impact. With membership across Canada, it is the only Association that represents and supports registered EAs. Members are recognized for being held to higher standards than other registered EAs including our Master Energy Advisor designation. Members access knowledge, discounts, a strong and supportive network and influence change by being part of the conversation with key industry and regulatory stakeholders.
